

# Does your cat have CKD (Chronic Kidney Disease)?

We are conducting a study to evaluate the impact of a dietary probiotic on the quality of life, body and muscle condition of cats with CKD

**Test Articles:** Azodyl probiotic vs placebo

**To be eligible or participate:**

Cats must be 8 years or older and weigh at least 5 pounds. Cats must also be diagnosed with CKD Stage 2 or greater. Cats cannot be pregnant, lactating or gestating. (additional criteria will be discussed during screening visit):

**Schedule and General Procedures:**

- 5 visits include screening visit, Day 0, Day 30, Day 60, and Day 90.
- Each visit involves a physical exam, plus blood and urine collection.
- Cats must be able to take oral medication daily during the study.

**Study Contact:** please refer potential study subjects to Dr. Montalvo
