- Adults aged 22+ with Type I or Type II diabetes
- Willing to have eyes dilated, undergo eye imaging and reserve approximately 2hrs for study participation

>30 Million

Adults living with diabetes in the US

“Diabetic retinopathy is the most common cause of vision loss among people with diabetes and a leading cause of blindness among working-age adults”

Centers for Disease Control and Prevention. National Diabetes Statistics Report, 2020. Atlanta, GA: Centers for Disease Control and Prevention, U.S. Dept of Health and Human Services; 2020.

Help us advance research to detect vision-threatening disease in the US
